It is also possible to use the Combi-Groove as separate components. Ideal for creating a separate side wall, back wall or fence. The Combi-Groove offers what the name stands for: give every project a unique touch.

LED lighting

LED there is light.

LED lighting spots

The LED lighting spots from Deponti give your veranda a refined and stylish look. Thanks to the smart integration in the in between beams of your veranda, they provide subtle and at the same time effective lighting. Atmospheric. Elegant. Functional.

Lumassina LED strips

For a modern, sleek and at the same time timeless look, the Lumassina LED strips complete your veranda. These LED strips bring your outdoor space to life in the evening. They provide a pleasant glow, perfectly attuned to the moment. With the dimming function, you set the right tone. From an intimate setting to bright lighting.

Concrete basis

Solid foundation.

You can place a Deponti veranda on any existing surface. Sometimes there are situations where extra strength is required, or where a good foundation is missing. Concrete foundations offer the perfect solution in this situation. Very easy and, of course, out of sight to assemble. Moreover, they are available with and without rainwater drainage. Every surface is different. So let our partner advise you well. Together, you will see what the best foundation is for your (garden) situation.

Heater

Turn on the heat.

Quartz Heater

Our Quartz Heater has a maximum output of 2000W and offers three heat settings. Built-in overheating protection is included as standard.

Heater Frico Relax Glass

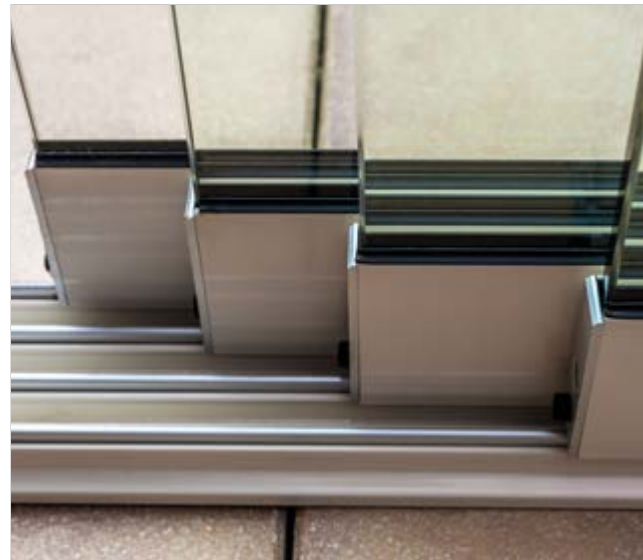

A sleek design featuring a black ceramic glass panel, delivering a premium, high-end look. Enjoy a comfortable warmth with reduced glare. The Burda Relax has a maximum output of 1800W and comes with a remote control for easy adjustment across three settings.

Handles

Prevent greasy fingers on the glass.

Open the glass sliding doors easily while the glass remains pleasantly clear. With the handles, you choose a beautiful finishing touch for your veranda with glass sliding doors. The door handles can be easily attached to a location of your choice. You can choose between adhesive handles and screw-in handles.

Tracking systems

Open and close in one go.

"Tracking systems" say it all. They ensure that all panels automatically move along when the glass doors open or close. This allows you to easily open or close the entire wall. The tracking system can be mounted variably in the profile, allowing you to decide where the panels should overlap.

Side and Centre Lock

Secure your space.

Beautiful design and optimum safety go hand in hand with the Side and Centre Lock. These smart locking systems offer a firm lock, which provides a reassuring feeling of protection. Practical, stylish and safe.

Side Lock vs Centre Lock

Two smart solutions, each with its advantages. With the Side Lock, a lock profile is mounted to the glass panel and two profiles to the posts and/or wall. The Centre Lock adds an extra lock profile so that two glass panels are firmly connected. The right solution for every situation.

Steel-look

Steel the show.

With the Fiano-Steel-look glass rods from Deponti, you combine an industrial look with a warm home feeling. The sleek design and the spacious look give your veranda or garden room a stylish and modern touch. Thanks to the characteristic black look, you can create a trendy and contemporary atmosphere in no time.

The future of carports

Coming home starts in the driveway.
